Stainless Steel FLAT BAR

Stainless steel flat steel is rectangular steel with slightly pure edges. Stainless steel flat steel can be semi-finished steel. In practical applications, common stainless steel flat steel includes cold-rolled polished stainless steel and hot-rolled acid white sandblasted stainless steel flat steel. Wuxi SDO [stainless steel factory](#) can provide various stainless steel products to meet your needs.

What Are The Applications Of the Stainless Steel Flat Bar?

[Stainless steel flat bar](#) is rectangular steel with slightly pure edges. Stainless steel flat steel can be semi-finished steel. In practical applications, common stainless steel flat steel includes cold-rolled polished stainless steel and hot-rolled acid white sandblasted stainless steel flat steel.

Stainless steel flat steel is used as bridges, house trusses, fences, power transmission ships, vehicles, etc. in construction projects. The raw material billets for the www.sdosssheet.com shirley@sdosssheet.com

production of stainless steel flat steels are low-carbon square steel billets, and the finished stainless steel flat steels are delivered in hot-rolled, cold-rolled or hot-rolled states. When ordering daily, we should fill in the dimensions of the side width and side thickness of the stainless steel flat steel, as well as the main other process items, such as annealing, solid solution, etc.

What Are the Precautions in Practice?

The surface quality of stainless steel flat steel is stipulated in the standard, and it is generally required that there should be no harmful defects in use, such as delamination, scarring, cracks, etc. Similarly, the allowable range of geometric shape deviation is also stipulated in the standard, which generally includes curvature, edge width, edge thickness, top angle, theoretical weight, etc., and stipulates that there is a significant torsion. In practice, it is generally delivered in bundles, and the number of strapping and the length of the same bundle should comply with the regulations. Generally, it is delivered naked, and transportation and storage must be protected from moisture.
